## **PARAMEDIC COURSE INFORMATION PACKET**

Dear Prospective Student,

Thank you for your interest in the Paramedic course offered by the Public Safety and Emergency Services Institute of Pima Community College. The helpful and friendly staff welcomes you and would like you to enjoy your educational experience.

This packet has been put together to give an overview of the paramedic course schedule, cost breakdown, prerequisites, and screening process. All items are subject to modification/change as regulatory and accreditation requirements require.

The EMT – Paramedic Program at Pima Community College is accredited by the Commission on Accreditation of Allied Health Education Programs ([www.caahep.org](http://www.caahep.org)) upon the recommendation of the Committee on Accreditation of Education Programs for the Emergency Medical Services Professions (CoAEMSP).

**Commission on Accreditation of Allied Health Education Programs**  
**25400 US Highway 19 N., Suite 158**  
**Clearwater, FL 33763**  
**[727-210-2350](http://727-210-2350)**  
**[www.caahep.org](http://www.caahep.org)**

## **Functional Job Analysis**

### **Paramedic Characteristics**

The Paramedic must be a confident leader who can accept the challenge and high degree of responsibility entailed in the position. The Paramedic must have excellent judgment and be able to prioritize decisions and act quickly in the best interest of the patient, must be self-disciplined, able to develop patient rapport, interview hostile patients, maintain safe distance, and recognize and utilize communication unique to diverse multicultural groups and ages within those groups. Must be able to function independently, at optimum level, in a non-structured environment that is constantly changing.

Even though the Paramedic is generally part of a two-person team generally working with a lower skill and knowledge level Basic EMT, it is the Paramedic who is held responsible for safe and therapeutic administration of drugs including narcotics. Therefore, the Paramedic must not only be knowledgeable about medications but must be able to apply this knowledge in a practical sense.

Knowledge and practical application of medications include thoroughly knowing and understanding the general properties of all types of drugs including analgesics, anesthetics, anti-anxiety drugs, sedatives and hypnotics, anti-convulsants, central nervous stimulants, psychotherapeutics which include antidepressants, and other anti-psychotics, anticholinergics, cholinergics, muscle relaxants, anti-dysrhythmics, anti-hypertensives, anticoagulants, diuretics, bronchodilators, ophthalmics, pituitary drugs, gastro-intestinal drugs, hormones, antibiotics, antifungals, antiinflammatories, serums, vaccines, anti-parasitics, and others.

The Paramedic is personally responsible, legally, ethically, and morally for each drug administered, for using correct precautions and techniques, observing and documenting the effects of the drugs administered, keeping one's own pharmacological knowledge-base current as to changes and trends in administration and use, keeping abreast of all contraindications to administration of specific drugs to patients based on their constitutional make-up, and using drug reference literature.

The responsibility of the Paramedic includes obtaining a comprehensive drug history from the patient that includes names of drugs, strength, daily usage and dosage. The Paramedic must take into consideration that many factors, in relation to the history given, can affect the type medication to be given. For example, some patients may be taking several medications prescribed by several different doctors and some may lose track of what they have or have not taken. Some may be using non-prescription/over the counter drugs. Awareness of drug reactions and the synergistic effects of drugs combined with other medicines and in some instances, food, is imperative. The Paramedic must also take into consideration the possible

risks of medication administered to a pregnant mother and the fetus, keeping in mind that drugs may cross the placenta.

The Paramedic must be cognizant of the impact of medications on pediatric patients based on size and weight, special concerns related to newborns, geriatric patients, and the physiological effects of aging such as the way skin can tear in the geriatric population with relatively little to no pressure. There must be an awareness of the high abuse potential of controlled substances and the potential for addiction, therefore, the Paramedic must be thorough in report writing and able to justify why a particular narcotic was used and why a particular amount was given. The ability to measure and re-measure drip rates for controlled substances/medications is essential. Once medication is stopped or not used, the Paramedic must send back unused portions to proper inventory arena.

The Paramedic must be able to apply basic principles of mathematics to the calculation of problems associated with medication dosages, perform conversion problems, differentiate temperature area between centigrade and Fahrenheit scales, be able to use proper advanced life support equipment and supplies ( i.e. proper size of intravenous needles ) based on patient's age and condition of veins, and be able to locate sites for obtaining blood samples and perform this task, administer medication intravenously, administer medications by gastric tube, administer oral medications, administer rectal medications, and comply with universal precautions and body substance isolation, disposing of contaminated items and equipment properly.

The Paramedic must be able to apply knowledge and skills to assist overdosed patients to overcome trauma through antidotes and have knowledge of poisons and be able to administer treatment. The Paramedic must be knowledgeable as to the stages drugs/medications go through once they have entered the patient's system and be cognizant that route of administration is critical in relation to patient's needs and the effect that occurs.

The Paramedic must also be capable of providing advanced life support emergency medical services to patients including conducting of and interpreting electrocardiograms (EKGs), electrical interventions to support the cardiac functions, performing advanced endotracheal intubations in airway management and relief of pneumothorax and administering of appropriate intravenous fluids and drugs under direction of off-site designated physician.

The Paramedic is a person who must not only remain calm while working in difficult and stressful circumstances but must be capable of staying focused while assuming the leadership role inherent in carrying out the functions of the position. Good judgment along with advanced knowledge and technical skills are essential in directing other team members to assist as needed. The Paramedic must be able to provide top quality care, concurrently handle high levels of stress, and be willing to take on the personal responsibility required of the position. This includes not only all legal ramifications for precise documentation, but also the responsibility for using the knowledge and skills acquired in real life-threatening emergency situations.

The Paramedic must be able to deal with adverse and often dangerous situations which include responding to calls in districts known to have high crime and mortality rates. Self-confidence is critical, as is a desire to work with people, solid emotional stability, a tolerance for high stress, and the ability to meet the physical, intellectual, and cognitive requirements demanded by this position.

### Physical Demands

Aptitudes required for work of this nature are good physical stamina, endurance, and body condition that would not be adversely affected by frequently having to walk, stand, lift, carry, and balance at times, in excess of 125 pounds. Motor coordination is necessary because over uneven terrain, the patient's, the Paramedic's, and other workers well-being must not be jeopardized.

### Comments

The Paramedic provides the most extensive pre-hospital care and may work for fire departments, private ambulance services, police departments or hospitals. Response times for nature of work are dependent upon nature of call. For example, a Paramedic working for a private ambulance service that transports the elderly from nursing homes to routine medical appointments and check-ups may endure somewhat less stressful circumstances than the Paramedic who works primarily with 911 calls in districts known to have high crime rates. Thus, the particular stresses inherent in the role of the Paramedic can vary, depending on place and type of employment.

However, in general, in the analyst's opinion, the Paramedic must be flexible to meet the demands of the ever-changing emergency scene. When an emergency exists, the situation can be complex, and care of the patient must be started immediately. In essence, the Paramedic in the EMS system uses advanced training and equipment to extend emergency physician services to the ambulance. The Paramedic must be able to make accurate independent judgments while following oral directives. The ability to perform duties in a timely manner is essential, as it could mean the difference between life and death for the patient.

Use of the telephone or radio dispatch for coordination of prompt emergency services is required, as is a pager, depending on place of employment. Accurately discerning street names through map reading, and correctly distinguishing house numbers or business addresses are essential to task completion in the most expedient manner. Concisely and accurately describing orally to dispatcher and other concerned staff, one's impression of patient's condition, is critical as the Paramedic works in emergency conditions where there may not be time for deliberation. The Paramedic must also be able to accurately report orally and in writing, all relevant patient data. At times, reporting may require a detailed narrative on extenuating circumstances or conditions that go beyond what is required on a prescribed form. In some instances, the Paramedic must enter data on computer from a laptop in ambulance. Verbal skills and reasoning skills are used extensively.

## Course Schedule

The program is tentatively scheduled to start TBD, with a projected graduation date of TBD. The paramedic class schedule varies, for the 'shift friendly format', class sessions are two days per week, both days normally from 0830 to 1700. Further instructions for class scheduling and confirmation of program delivery will be given upon acceptance into the program.

The Paramedic program carries a course load of 48-52.5 credit hours. The following is a breakdown of the hours:

### **Distributive Education:**

42 hours for research paper

48 hours Medical Terminology

### **Classroom Didactic Hours:**

588 hours

- Virtual delivery of lectures may be included due to unavoidable situations (ie: COVID 19). PCC will follow all CDC and local recommendation to protect students, staff and our community.

### **Clinical and Vehicular Rotation Hours:**

500 hours (minimum)

- Unavoidable situations (i.e., COVID 19) may limit the availability of clinical/field sites, at the discretion of the PCC staff /Medical Director and agency medical administration some hours may be completed through virtual simulation if necessary.

Currently all class sessions and screening will be held at the 29th St. Coalition Center, 4355 E Calle Aurora. (29th St. and Columbus) - **Building A**

In addition to classroom time, the student must complete at least 500 hours of clinical and vehicular rotations. The student is required to schedule these hours outside of class time throughout the paramedic course.

The course contains the following classes:

• *EMT 155	AMLS	1.5 credits
• *EMT 140	PHTLS	1.5 credits
• EMT 170	Operations	1.5 credit
• EMT 205	ALS Pharmacology and Medication	3.5 credits
• EMT 214	ALS Advanced Special Consideration	2.0 credits
• EMT 218	Paramedic National Registry Preparatory	3.0 credits
• EMT 219	ALS Foundations	1.0 credit
• EMT 221	ALS Airway and Ventilation	2.0 credits
• EMT 222	ALS Patient Assessment and Assessment Based Management	2.0 credits
• EMT 223	ALS Trauma Emergencies and Systems	2.5 credits
• EMT 224	ALS Medical Emergencies	4.0 credits
• EMT 225	ALS Special Medical Considerations	2.5 credits
• EMT 227LC	ALS Practicum: Clinical Lab	1.5 credits
• EMT 228LC	ALS Practicum: Vehicular Lab	2.0 credits
• EMT 230	Basic ECG Interpretation	3.0 credits
• EMT 242	ALS Advanced Foundations	4.0 credits
• EMT 244	ALS Advanced Medical Emergencies	2.5 credits
• EMT 247LC	ALS Advanced Practicum: Clinical Lab	2.0 credits
• EMT 248LC	ALS Advanced Practicum: Vehicular Lab	4.0 credits
• EMT 250	Advanced Cardiac Care	1.0 credit
• EMT 252	Pediatric Advanced Life Support	1.0 credit
• EMT 254	Advanced ECG Interpretation	2.0 credits
• *EMT 258	Pediatric Education for Pre-hospital Professionals	1.5 credits
• EMT 295	ALS Independent Research	1.0 credit

\*Course with an \* are not a components of the Paramedic AAS degree but required coursework for this sponsored program. May not be eligible for certain funding sources (i.e., GI Bill/veterans benefits).

Financial aid is available if you qualify. You must see a Financial Aid Advisor for more information.

The Paramedic course follows the National Education Standards and is approved by the Arizona Department of Health Services, Bureau of Emergency Medical Services. Upon successful completion of the program the student will be eligible to take the National Registry of Emergency Medical Technicians exams. Completion of the Paramedic course alone does not certify a student for employment. Certification is controlled entirely by the Arizona Department of Health Services, Bureau of Emergency Medical Services.

### Tuition and Fees

Tuition and Fees are being paid by your sponsoring organization and may not be consistent with open enrollment pricing due to the structure and pace of the program. The information below is provided as a courtesy, please contact the program for currency in pricing and ISBN's/book editions.

- Tuition and fees \$6607.75 (48-52.5 credits)
- Text Books (*approximate* cost) \$1451.66
- 10 panel Drug Screen \$20.00 (approx.)  
(prerequisite)
- Total *estimated* costs \$8079.41**

*\*Instructions for obtaining these will be given out during class*

**Course fees also include (All will be handed out in class):**

- Stethoscope
- Pocket Mask
- Pen Light
- PCC-PSESI Polo Shirt
- PCC-PSESI T-Shirt
- PCC Nametag

**Pre-requisites**

Items required to register for the ALS Entrance Exam to start the screening process.

***PLEASE NOTE: Only PDF format will be accepted. NO screenshots, NO pictures, images, or jpegs. Only PDF and each document must be on its own PDF, not combined into one attachment.***

- A. Current EMT-Basic or AEMT certification. This certification **MUST** remain current throughout the paramedic course (a lapse in certification will result in immediate expulsion from the program) and be either:
  - 1. National Registry certification; or
  - 2. State of Arizona certification
- B. Proof of Arizona Department of Health Services online account (printout of online profile), a current AZDHS certification is sufficient.
- C. American Heart Association Basic Life Support for the Healthcare Provider certification card, or program approved equivalent. This card must remain current throughout the course of training and the certification process.
- D. Proof of 18 years old
- E. Active MyPima Account
- F. No restrictions/holds (Academic or Financial) on Pima Account. Account balance must be zero.
- G. Reading Assessment (completed within the past 12 months) – we can no longer accept degrees for this item.
- H. Pima College Criminal History Form (completed and signed)
- I. Proof of Health Insurance Coverage, and must remain current throughout the program
- J. FERPA Student Authorization for Release of Educational Records (if applicable) – will be provided to you at the written entrance exam if agency sponsored/supported.

The remaining prerequisites will be due within one week of the start date of the program. Your prerequisite packet must be turned in complete with ALL prerequisites, or it will not be accepted.

- K. Provide proof of immunity or immunization for the following, any handwritten records (ex: childhood records) will not be accepted. The documentation must be an official printed document with patient name and DOB, along with the name of the clinic and/or doctor's office, date/time administered. Transcription of records is not acceptable (ie: school records or records of administration that are transcribed). State and/or county records can be downloaded.
  - 1. \*\*Current Flu Shot. **Due prior to starting clinical rotation and must remain current throughout rotations.**
  - 2. Measles (Rubeola)/Mumps/Rubella: Positive titer for all 3, or

documentation of a completed series of MMR immunizations. One series includes 2 immunizations for each disease on separate dates at least 28 days apart.

3. Varicella: Positive titer for Varicella or documentation of a completed series. One series includes 2 immunizations 30 days apart. *Please note: All that is accepted is proof of having the immunizations administered, or titers. Doctor's documentation of having had the disease will not be accepted.*
4. Tetanus/Diphtheria/Pertussis (Tdap): A one-time adult dose of Tdap (age 19 or older), followed by Td booster every 10 years.
5. Results of serological testing showing Hepatitis B (HBV) immunity, proof of HBV vaccination series of 3 does.
6. Proof of 2 negative TB test or chest X-ray's **please see attached Banner requirements.**
  - One can be no more than 12 months old and the other must never expire (12 months) during the program.
7. COVID Vaccinations and Boosters and/or exemptions are required.
  - For religious or medical exemption, these will be submitted once enrolled in the program. An exemption from your current employer does not guarantee an exemption will be supported by our clinical sites.
8. Negative results of a 10-panel drug screening within 1 month of the course start date. **Results must be sent to PSESI directly from the lab.**
  - **10 Panel must screen:**
    - Amphetamines
    - Barbituates
    - Benzodiazepines
    - Methadone
    - Opiates
    - Phencyclidine
    - Oxycodone
    - Cocaine
    - Marijuana
    - Alcohol
    - Fentanyl Metabolite

L. Medical Clearance: Physical and Mental Medical Clearance (ie: fit for duty as an EMS provider)

M. N95 Respiratory Mask Fit Test.

## **Screening Process**

### Entrance Exam Breakdown

1. ALS entrance Exam consisting of 150-question multiple-choice, electronically graded.
2. Oral board consisting of not less than 2 members selected by the Program Administration.

The weighted percentages will be as follows:

Written ALS entrance:	50%
Oral board:	50%
Total	100%

**The candidate should obtain an overall score of 70% to be eligible for attendance in a PSESI paramedic course. Scores of less than 70% will be reviewed and discussed with the sponsoring agency. Seats will be filled based on these scores, along with the approval of the PSESI Medical Director.**

### Breakdown of Scoring

Written ALS entrance:

The written ALS entrance exam will be scored on a percentage basis.

Oral Board:

The oral board will consist of questions relating to history, reasons for enrolling, support systems, past experience, judgment questions, and question on expected EMT-B knowledge. The candidates will be scored on each question as well as overall presentation.

## **ALS Entrance Exam**

**Scheduling to take the ALS Entrance Exam - TBD.**

- The ALS entrance exam will be a computer-based exam with 150 questions and based on the EMT National Standards Curriculum. The candidate will have 2 ½ hours to complete the exam and will have one attempt only.

**Before the exam, please make sure you are a current Pima Community College student and have activated your MyPima Account - <https://mypima.pima.edu/cp/home/displaylogin>.**

The exam will be based solely on EMT-B knowledge (National Standards Curriculum). It is recommended that the candidate prepare for this ALS entrance exam. Please utilize a current EMT-Basic textbook to study.

## **Oral Board Interview**

**Scheduling to take the Oral Board Interview – TBD.**

The Candidate is required to participate in an Oral Interview. The Oral Interview will last approximately 30 minutes. Please allow extra time for scheduling adjustments.

The PSESI Medical Director will make the final determination whether or not a candidate is accepted into a PSESI paramedic program. The Medical Director will take the candidate's screening results, criminal history, past educational and/or screening history with the PSESI, and whether or not all the prerequisites have been completed and verified into account in making the determination to accept or deny the candidate entrance into the paramedic course.

Further questions regarding the Paramedic Program or other programs that the PSESI offers may be forwarded to: Sharon Hollingsworth – [shollingsworth@pima.edu](mailto:shollingsworth@pima.edu). Please use this contact info for all course related items.

### **Verification of 9<sup>th</sup> Grade Reading Level**

The Candidate must show proof of the ability to read at the 9<sup>th</sup> grade level. The student can be tested for free at any Pima Community College test center.

The minimum score is 9<sup>th</sup> grade level is mandatory according to ADHS. The only acceptable type of assessment tests is Accuplacer. (*Please understand the curriculum is written at an 11-grade reading level*).

### **10-Panel Drug Screening**

The candidate must provide proof of negative 10-panel drug screening. This test must be done no earlier than within 6 months of the start date of the class. The student can obtain this test from their Primary Care Physician, or several other independent clinics around town. J2 Labs. offers a discount to our students. If using J2 Labs, please contact the PSESI office before testing (520-206-3502). **Drug screening must be sent to PSESI directly from the lab and must include the following substances:**

Last

First

Middle

1. Are You Currently:

- Incarcerated for a criminal conviction?  YES  NO
- On parole for a criminal conviction?  YES  NO
- On supervised release for a criminal conviction?  YES  NO
- On probation for a criminal conviction?  YES  NO

2. Before the date of filing this application, have you been convicted of any of the following crimes, or any similarly defined crimes, in Arizona or in any other state or jurisdiction, unless the conviction has been absolutely discharged, expunged, or vacated:

- 1st or 2nd degree murder?  YES  NO
- Attempted 1st or 2nd degree murder?  YES  NO
- Sexual assault?  YES  NO
- Attempted sexual assault?  YES  NO
- Sexual abuse of a minor?  YES  NO
- Attempted sexual abuse of a minor?  YES  NO
- Sexual exploitation of a minor?  YES  NO
- Attempted sexual exploitation of a minor?  YES  NO
- Commercial sexual exploitation of a minor?  YES  NO
- Attempted commercial sexual exploitation of a minor?  YES  NO
- Molestation of a child?  YES  NO
- Attempted molestation of a child?  YES  NO
- Dangerous crime against children (A.R.S. § 13 604.01)?  YES  NO

3. Before the date of filing this application, have you been convicted of a misdemeanor involving moral turpitude in Arizona or any other state or jurisdiction, other than one listed in question 2, unless the conviction has been absolutely discharged, expunged, or vacated?

YES  NO

4. Before the date of filing this application, have you been convicted of a felony in Arizona or in any other state or jurisdiction, other than a felony listed in question 2, unless the conviction has been absolutely discharged, expunged, or vacated?

YES  NO

5. Before the date of filing this application, have you had EMT certification or recertification revoked ?

YES  NO

6. Before the date of filing this application, have you been convicted of a misdemeanor in Arizona or in any other state or jurisdiction, involving possession, use, administration, acquisition, sale, manufacture, or transportation of an intoxicating liquor, dangerous drug, or narcotic drug, unless the conviction has been absolutely discharged, expunged, or vacated?

YES  NO

7. Before the date of filing this application, have you been convicted of a misdemeanor in Arizona or in any other state or jurisdiction, involving driving or being in physical control of a vehicle while under the influence of an intoxicating liquor, a dangerous drug, or a narcotic drug, unless the conviction has been absolutely discharged, expunged, or vacated?

YES  NO

## Paramedic Program Pre-Requisite Tracking Sheet

Name: \_\_\_\_\_ Date: \_\_\_\_\_

Upon acceptance into the paramedic program, the remaining prerequisites will be due within one week of the start date of the program. The remaining prerequisites must be turned in ALL at once or it will not be accepted. **Immunizations and certifications must remain current throughout the program.**

**PLEASE NOTE:** Only PDF format will be accepted. NO screenshots, NO pictures, images or jpegs. Each document must be on its own PDF, not combined into one attachment.

- Provide proof of immunity or immunization for the following (specific clinical immunization requirements attached) any handwritten proof of immunizations (ex: childhood records) will not be accepted. It must be a printed document with patient name and DOB, along with the name of the clinic and/or doctor's office:
  - \*\*Current Flu Shot **Due prior to starting the clinical rotation and must remain current throughout rotations:**
  - Measles (Rubeola)/Mumps/Rubella: Positive Titers for all 3, or documentation of a completed series of MMR immunizations. One series includes 2 immunizations for each disease on separate dates at least 28 days apart
  - Varicella: Positive titer for Varicella or documentation of a completed series. One series includes 2 immunizations 30 days apart. Please note: Documentation from a doctor stating you have had the disease will not be accepted, only what has been stated.
  - Tetanus/Diphtheria/Pertussis (Tdap): A one-time adult dose of Tdap (age 10 or older), followed by a Td booster every 10 years
  - Results of serological testing showing Hepatitis B (HBV) immunization, begin HBV vaccination series, or sign the release of liability claims/declination form

- Proof of 2 negative TB skin tests or chest X-ray **please see attached Banner requirements**
  - One can be no more than 12 months old and the other must never expire (12 months) during the programDate of 1<sup>st</sup> TB: \_\_\_\_\_ Date of 2<sup>nd</sup> TB: \_\_\_\_\_
- COVID Vaccinations and Boosters and/or exemptions are required
  - For religious or medical exemption, these will be submitted once enrolled in the program. An exemption from your current employer does not guarantee an exemption will be supported by our clinical sites.
- Negative results of a 10-panel drug screening within 1 month of the course start date. Referrals to J2 Labs are available upon request. **Results must be submitted to PSESI directly from the lab or doctor's office.**
- Medical Clearance: Physical and Mental Clearance
- N95 Respiratory Mask Fit Test

***Criminal Background check will be processed through MyClinical Exchange. If questionable activities are found a student is subject to dismissal from the program as they will not be permitted to engage in required patient care activities at clinical or field sites.***

## How to Meet Banner Health Immunization Requirements

\*Subject to other specific test or Health Standard as Banner Health may request from time to time\*

### MMR (Measles/Rubeola, Mumps, & Rubella):

- I. Documentation of positive IgG titer for Measles/Rubeola, Mumps and Rubella. *Choose this option if you had all three illnesses OR you have received the vaccinations but have no documented proof.*
  - If any of the titer results are NEGATIVE or EQUIVOCAL, you must get your first MMR vaccination and provide proof of documentation. The second MMR must be completed after 28 days and documentation submitted.
- II. Documentation of completion of one series of MMR immunizations. *One "series" of immunizations includes two immunizations for each disease on separate dates at least 28 days apart.*

### Varicella (chickenpox)

- I. Documentation of positive IgG titer for Varicella. *Choose this option if you had chicken pox OR you have received the vaccinations but have no documented proof.*
  - If any of the titer results are NEGATIVE or EQUIVOCAL, you must provide proof of your first Varicella vaccination and documentation of the second vaccination completed 30 days later.
- II. Documentation of completion of one series of Varicella immunizations. *One "series" of immunizations includes two immunizations 30 days apart.*

### Tuberculosis (TB)

Annual Documentation of TB free status is required; documentation must cover your entire rotation.

- I. Documentation of completion of a negative Two-Step TB Skin Test. *Two-Step TB Skin Test consists of an initial TB skin test and a boosted TB skin test 1-3 weeks following the first test.*
  - If results are POSITIVE, you must provide documentation of a clear chest X-ray or negative IGRA test.
- II. Documentation of completion of a negative Two-Step TB Skin Test and recent annual testing.
- III. Documentation of a negative chest X-ray **and** annual documentation of a TB disease-free status by completing a Tuberculosis Screening Questionnaire.
- IV. Documentation of a recent negative result from an IGRA test (Quantiferon, T-Spot).

### Hepatitis B

- I. Documentation of positive HbsAB titer. *Choose this option if you have received the vaccinations but have no documented proof.*
- II. Documentation of completion of one series of Hepatitis B immunizations. *One "series" of Hepatitis B immunizations includes three injections, an initial injection followed by a second injection given 1 to 2 months after the first dose and a third injection 4 to 6 months after the first.*
- III. Signed Declination form.

**Influenza Vaccine:** Required for any student whose rotation will occur one or more days during the flu season, December 1-March 31.

- I. Documentation of recent immunization
- II. Signed medical or religious exemption form. *This will require that a mask be worn during the designated flu season.*

It is **recommended** for personal safety and protection that Students receive the following immunizations:

### Tetanus/Diphtheria/Pertussis (Tdap):

- I. A one-time adult dose of Tdap (age 19 or older), followed by a Td booster every 10 years.  
*Tdap = Tetanus / Diphtheria / Pertussis, Td = Tetanus / Diphtheria*
